

REVERSE RECRUITING

A HIRING PLATFORM WHERE:

**Employers initiate and compete for talent,
while talent decides which opportunities to engage.**

CONCEPT

This platform is designed to eliminate the need for talents to apply across multiple job platforms by establishing a single, comprehensive professional profile where opportunities come directly to them.

WHAT MAKES THIS DIFFERENT?

FOR TALENTS

- Why should qualified talent keep proving themselves over and over?
- Traditional platforms require repeated applications, repeated preparation, and unpaid effort just to be considered—often without response.
- This platform removes that cycle by giving talents a single, evolving **professional identity** where visibility is earned once and opportunities come directly to them—allowing them to engage only where their time is valued.

FOR EMPLOYERS

- Why spend time filtering applicants who were never a fit?
- Traditional hiring creates volume, not clarity—forcing employers to sort through inconsistent candidates across multiple platforms with little continuity.
- This platform replaces that with direct access to structured, progressively refined talent—**enabling targeted outreach, reducing unqualified interactions**, and allowing employers to track and re-engage candidates over time.

HIRING ENVIRONMENT REDEFINED

THE PLATFORM

- Why should employers pay premium rates while talent receives only a fraction of that value?
- Traditional hiring channels—particularly agencies and some platforms—often introduce significant markups, where employers are charged high fees while talent receives only a portion of the actual value they generate. This creates inefficiency, misalignment, and limited transparency on both sides.
- This platform addresses that imbalance by enabling direct, structured engagement between employers and talent, where costs are significantly reduced and value is more transparently distributed. Instead of paying for layered intermediaries, employers interact directly within a system where pricing, intent, and engagement are clear and controlled.
- The result is a more efficient and fair hiring environment—where employers spend less for better access, and talent retains a greater share of the value they create.

HOW IT WORKS

FOR

TALENTS

Talents establish a single, structured professional identity that replaces the need to apply across multiple platforms, allowing opportunities to come directly to them.

CORE PROFILE

- **AI-assisted resume** → Professionally structured and continuously optimized
- **Introduction video** → Enables employers to assess communication and personality
- **Discovery profile** → Skills, experience, work style, and preferences
- **Status & availability** → Open to work, exploring, or currently employed but receptive
- **Assessment results (future layer)** → Standardized validation of skills and capability

ENGAGEMENT MODEL

- **Talents receive inbound requests from employers:**
 - Free interview requests
 - Paid interview requests
 - Paid assessments (pre-screening tasks)
- **Talents evaluate and choose which opportunities to engage based on:**
 - Relevance
 - Alignment
 - Value (including compensation for time)

HOW IT WORKS

FOR

TALENTS

Talents establish a single, structured professional identity that replaces the need to apply across multiple platforms, allowing opportunities to come directly to them.

FREE VERSION

- Create and maintain full profile
- Receive and respond to employer requests
- Participate in free or paid engagements

Although it's free, nothing in the experience is compromised

PREMIUM VERSION (OPTIONAL)

- Increased visibility / profile boosting
- Advanced AI optimization
- Verified / trusted profile badge
- Analytics (profile views, demand insights)
- Priority access to opportunities

Affordable premium access to the talents, starting at \$1 per month

HOW IT WORKS

FOR EMPLOYERS

Employers move from posting jobs and filtering applicants to directly identifying, tracking, and engaging talent within a structured system.

DISCOVERY PROFILE

- Organization or personal hiring profile
- Work environment and expectations
- Engagement preferences
 - (free vs paid interactions)
- Hiring intent and priorities

TALENT ACCESS

- Browse structured talent profiles
- Filter based on skills, preferences, and assessments
- Track candidates over time
 - (progress, updates, availability)

ENGAGEMENT MODEL

- Employers initiate interaction through:
- Free interview requests
- Paid interview requests (priority signal)
- Paid assessments (pre-screening tasks)

Payment acts as a signal of seriousness; make an early impression to the type of employer you are

HOW IT WORKS

FOR EMPLOYERS

Employers move from posting jobs and filtering applicants to directly identifying, tracking, and engaging talent within a structured system.

FREE VERSION

- Limited profile views
- Limited outreach
- Basic browsing and engagement

Although it's free, nothing in the experience is compromised

PREMIUM VERSION (OPTIONAL)

- Increased or unlimited talent access
- Advanced filtering and tracking
- Priority engagement options
- Paid interaction capabilities (interviews, assessments)
- Employer visibility (featured status e.g. "Featured Employer", "Top Opportunities")

Affordable premium access to the talents, starting at \$10 per month

CURRENT REVENUE MODEL

The platform earns from both talents and employers through optional premium features, as well as small service fees on paid interactions. Both sides can use the platform for free with basic access, but can upgrade to premium for better visibility, increased access, and additional tools.

In addition, when employers send paid interview requests or assessments, the platform applies a small service fee (e.g., 2%–5%) on each transaction. This means revenue is tied to actual activity and engagement on the platform.

FUTURE REVENUE MODEL

As the platform grows, we can expand features that both talents and employers may choose to pay for, such as advanced profile tools, better visibility, and improved tracking or analytics.

We can also introduce additional services like featured placements and, eventually, a managed hiring service for employers who want more support. These can be added gradually without changing the core experience of the platform.

PHASE 1 — BUILD THE TALENT BASE

The first step is to establish a strong pool of talent before introducing employers.

- Create social media channels and begin daily content
- Invite talents to register early and submit profiles
- Collect and organize initial talent data (100–300 users)
- Begin development of the platform (profile system, basic flow)

Goal: Have a visible and usable talent base ready before launch

Day 1–5

- Create social media channels
- Start daily content posting
- Begin inviting talents to pre-register

Day 1–10 (parallel)

- Start platform development
- Design profile structure and basic system

Day 5–30

- Collect initial talent profiles (target: 100–300)
- Organize and prepare data for platform onboarding

Day 30–40

- Soft launch to talents
- Test profile flow and user experience
- Gather early feedback

PHASE 2—ACTIVATE EMPLOYERS

Once talent supply is available, employers are introduced into the system.

- Invite employers to explore available talent
- Allow limited free access to encourage adoption
- Enable initial interactions (free and paid requests)
- Observe behavior and refine matching flow

Goal: Start real engagement between employers and talent

Day 41–50

- Invite employers to explore available talent
- Provide limited free access
- Begin initial outreach (manual if needed)

Day 50–60

- Enable employer interactions
- Test:
 - Free requests
 - Paid interview requests
 - Paid assessments

PHASE 3 — INTRODUCE REVENUE & OPTIMIZE

After initial usage, the platform begins monetization and refinement.

- Introduce premium features (talent and employer)
- Activate service fee on paid interactions
- Gather feedback from both sides
- Improve system based on real usage

Goal: Stabilize the model and begin consistent revenue generation

Day 61–70

- Introduce premium features (both sides)
- Activate service fee on paid interactions
- Run simple surveys (willingness to pay, feedback)

Day 70–90

- Refine pricing and features
- Improve matching and UX
- Monitor engagement patterns

Day 91 and beyond

- Refine and revolutionize the hiring sector
